MIXING DIRECTIONS:

- Empty powder from stick into empty dry glass (each stick thickens 4 fl. oz. of liquid).
- Pour desired liquid quickly over thickener in glass.
- Stir briskly with fork until dissolved and let stand. Allow 5-10 minutes for product to reach desired thickness.

Clear thickener requires 5-10 minutes to fully thicken most beverages. Nutritional Supplements, dairy products, carbonated and high acid beverages may take slightly longer and may require additional THICK & EASY[®] to thicken.

Temperature may alter viscosity. IDDSI levels should be at refrigerated temperatures.

Thickener products are not suitable as sole source of nutrition, and are only appropriate for use in individuals above three years of age. Viscosity can vary based on beverage attributes. Products in question should be tested prior to service.
